

# Enterprise

## > What is this course?

The course is Enterprise Activity at Intermediate 2 level.

## > Course content:

The course is project based and can be integrated into either an existing project or a new standalone project can be created. You are expected to formulate the idea, plan and organise the activity bringing it to a successful conclusion.

## > Course assessments:

The course is assessed by means of a portfolio of evidence supplemented by some individual written materials. In practice this means that the students will individually reflect on their own development, whilst the group will provide notes/minutes/posters/photographs as appropriate to their project.

## > Who should consider this course?

The course should be considered by 5th or 6th year pupils who are already undertaking a school project such as the yearbook production, an event in the school or a tie in with external organisations such as Young Enterprise Scotland.

## > What makes this option different?

This option is different due to its integrative nature. Much of the evidence for assessment purposes is being produced anyway so there is little additional work but you will receive the benefit of an SQA qualification.

## > What can I do when I finish the course?

You will gain skills which you can use throughout your career.
